**Notes:**

- Plan is to isolate the project > focus on the “how to play” aspect. The primary function will be for the website to teach people the rules of poker, so they can play themselves.
- We’ve decided to pick a specific angle, rather than tackle an entire overview of poker history. This way we can explain the specifics and portions relative to the players.
- Positions within poker: dealer, players, role when you leave
- Page for card combinations > three of a kind, full house, flush
- Aesthetic could potentially parallel casino/poker color schemes and visage
- Leaning towards found images rather than personal illustrations
- Overall, we are excited to teach people about poker!
- Typeface to be determined
- Text and words to be organized by May for Friday
